Undergraduate Informatics student (Software Engineering) with hands-on experience building production-grade web applications using Laravel. Contributed to real-world SIMRS and HRIS systems during internship using Laravel & Filament, with experience integrating REST APIs and managing multi-database environments. Served as lab assistant for 5 programming courses and published in a peer-reviewed journal. Actively seeking a Software Engineer Internship to apply and deepen backend development skills in an industry environment.

Experience

Programmer Intern

PT Sistem Kesehatan Indonesia, Yogyakarta, ID

February 2026 – Maret 2026

- Contributed to developing SIMRS (Hospital Information System) and HRIS modules using Laravel & Filament, supporting hospital operational workflows
- Built dynamic, responsive UI components with jQuery & AJAX to improve user interaction
- Integrated REST APIs and managed multi-database environments (MySQL, PostgreSQL, SQLite)
- Performed debugging, testing, and query optimization to improve system stability and performance

Laboratory Assistant

AKPRIND University Indonesia, Yogyakarta, ID

September 2024 – December 2025

- Delivered practicum sessions for 5 courses to Informatics students across Semesters 1–3, covering Programming Algorithm (C++, Raptor), Data Structure (C++), Structured Programming (Python), Database Management System (PostgreSQL), Object Oriented Programming (Java), and Operating System (Linux Ubuntu, Docker, Git)
- Guided and evaluated students through hands-on lab exercises, ensuring comprehension of core CS fundamentals

Extracurricular ICT Teacher

Al-Qur'an Islamic Boarding School, Yogyakarta, ID

July 2025 – November 2026

- Teaching Microsoft Office (Word, Excel, PowerPoint), Canva, and Scratch to students for productivity, design, and introductory programming skills

Projects

MORA – Financial Technology — Website Application | 2026

Tech Stack: React (Vite), Tabler UI, TanStack Query, Laravel 13, AI SDK (Gemini/Groq), FastAPI, AI OCR, PostgreSQL, Docker

GitHub: github.com/ahmadrizal1st/mora

- Built an AI-powered fintech web app integrating OCR for automated financial document processing
- Connected multiple LLM providers (Gemini, Groq) via AI SDK for intelligent financial insights
- Containerized full-stack architecture using Docker with FastAPI microservice for AI processing

Nitisaka — Website Application | 2026

Tech Stack: React (Vite), TypeScript, Tailwind CSS, shadcn/ui, Radix UI, Framer Motion, GSAP, TanStack Query, Recharts, React Router

GitHub: github.com/ahmadrizal1st/nitisaka

- Built a high-performance, animation-rich frontend application with fluid micro-interactions and page transitions using Framer Motion and GSAP
- Crafted a polished, accessible component system leveraging shadcn/ui and Radix UI primitives for consistent, keyboard-navigable UI
- Implemented smooth scroll-triggered animations, staggered entrance effects, and dynamic data visualizations using Recharts
- Achieved clean routing architecture with React Router and efficient server-state synchronization via TanStack Query

HUMANIKA Organization Management System — Website Application | 2025

Tech Stack: Next.js, TypeScript, Tailwind CSS, Prisma ORM, MongoDB, Google Drive API

GitHub: github.com/ahmadrizal1st/website-humanika

- Built a full-stack official web platform for HUMANIKA (Informatics Student Association, AKPRIND University), actively used by 50+ members
- Features include organization profile, divisions, activity management, member registration, gallery, and cloud-based document storage via Google Drive API

Keeper App — Mobile Application | 2025

Tech Stack: Kotlin, Firebase Authentication, Firebase Storage, Room Database, SQLite

GitHub: github.com/ahmadrizal1st/keeper-app

- Developed a secure mobile file storage app with offline access, real-time cloud sync via Firebase, and local caching using Room Database (SQLite) for fast offline data retrieval

Publication

Penerapan Metode Design Thinking dalam Perancangan Sistem Manajemen Keuangan Berbasis Website Responsive untuk UMKM Wijaya Kusuma Craft

Prita Haryani, **Ahmad Rizal**, Dinul Hayat, Erfanti Fatkhiyah, Uning Lestari

Jurnal Teknologi, Vol. 18, No. 2, pp. 141–149, 3 December 2025

Skills

- Programming (TypeScript, JavaScript, Python, PHP, Kotlin)
- Web Development (React, Next.js, Laravel, FastAPI, Tailwind CSS, Bootstrap)
- Mobile (Android/Kotlin, Firebase, Room Database)
- Databases (PostgreSQL, MySQL, MongoDB) | ORM (Prisma, Eloquent)
- AI Integration (Gemini, Groq, OCR, Whisper)
- Tools (Git, Docker, Linux, Figma, Canva, CapCut)
- Problem Solving, Clean Architecture, OOP, DSA

Organization Experience

Research and Development Department

Informatics Student Association (AKPRIND University Indonesia)

January 2024 – February 2025

- Collaborating with Informatics students in research and development of knowledge in the IT sector
- Conduct training for competitions such as Gemastik, Student Creativity Program, and Student Organization Capacity Building Program

General Secretary

Informatics Student Association (AKPRIND University Indonesia)

January 2025 – February 2026

- Managed organizational administration, documentation, and official correspondence.
- Prepared meeting agendas, minutes, and official reports.
- Maintained and organized incoming and outgoing letters.
- Coordinated administrative support for executive board and divisions.

Volunteer

Documentation Design and Publication

Informatics Student Association Student Organization Capacity Building Program (Directorate of Belmawa, Ministry of Education, Culture, Research, and Technology (Kemendikbudristek))

February 2024 – November 2024

- Created documentation designs, including activity reports and proposals, for internal and external organizational purposes.
- Managed and developed creative content for Instagram and TikTok (@ppkormawahumanika), including posters, infographics, and promotional videos to increase awareness and public engagement.

Coordinator of Documentation Design and Publication

AKPRIND Sport Week 2025/PORISTA (AKPRIND University Indonesia)

July 2025 – July 2025

- Designed and published event documentation for AKPRIND Sport Week, covering 6 sports branches: futsal, chess, table tennis, badminton, volleyball, and e-sports (Mobile Legends).
- Managed visual content and documentation throughout a 6-day event (July 18–23, 2025).
- Published and archived full event documentation on Instagram @akprindsportweek.

Education

AKPRIND University Indonesia, Yogyakarta, ID

Bachelor of Informatics (Software Engineering)

September 2023 – Present | Current Semester: 6

GPA: 3.89
